

THREE EASY STEPS

01

Check Availability

First things first, let's see if Bountiful Fiber is available in your area by going to our website.

02

Choose Your ISP

Once you've confirmed availability, you can select a local Internet Service Provider with the features you want.

03

Sign Your Agreement

Finally, sign your service agreement and schedule your fiber installation!

HOW IT WORKS

Utilizing light to transfer information, it's the fastest communication technology on the planet. Most current networks operate on copper wire infrastructure that limits the speed and amount of information that can be transferred. But with Bountiful Fiber you can reach speeds over 30 times faster than your current connection. Plus, you enjoy the same fast-as-light performance for parallel download and upload speeds.

FREEDOM THAT COMES WITH A CHOICE

Bountiful Fiber lets you choose your own service provider so you're not limited to just one option. The connection to your home is also yours alone - you'll never lose speed through a shared connection with another home or business.

ISP PRICING INFORMATION

ISP Name	250 Mbps	1 Gbps	10 Gbps	Phone	Video
	\$37.95	\$47.95	\$155.95	\$24.95	n/a
